

The Klinik Solequelle and EvoCare are celebrating five years of a successful partnership that is revolutionising post-rehabilitation care.

Furth and Bad Westernkotten, Germany 06 October 2023.

Klinik Solequelle is setting new standards in rehabilitation and aftercare, and at the heart of this transformation is its partnership with EvoCare. The orthopaedic specialist clinic for medical rehabilitation (Med. Reha), aftercare (AHB) and medical-vocational rehabilitation (MBOR) offers comprehensive care and therapy with state-of-the-art medical equipment and an exceptionally qualified team of professionals. However, one of the key differentiators of the *Klinik Solequelle* is its innovative approach to post-treatment care with the EvoCare technology.

The patient list at the *Klinik Solequelle* in Bad Westernkotten includes a wide range of people. People of all ages with a variety of medical needs find a haven here. Whether they are recovering from orthopaedic surgery to the hip, knee or shoulder, or on the road to recovery from spinal injuries, *Klinik Solequelle* tailors its services to meet the unique needs of each patient. In addition, the specialist clinic extends its care to those in need of comprehensive pain management and medical-vocational rehabilitation (MBOR).

Klinik Solequelle has built up an enviable reputation for creating tailor-made treatment plans that are finely tuned to individual needs. This personalisation makes a significant contribution to patients' recovery and quality of life. The many

awards and accolades received by the *Klinik Solequelle* in recent years are testament to the exceptional quality of care provided, to the benefit of both patients and staff. These awards include the prestigious Focus title as one of the top 100 clinics, the coveted TOP Innovator award in 2020 for pioneering the use of innovative therapeutic approaches, and the esteemed Employer of the Future award in 2023. However, Klinik Solequelle's commitment to patient wellbeing does not end with the patient's stay during rehabilitation and aftercare.

The clinic's managing director, Michael Kemper, is well aware of the importance of continued support after the patient has left. Kemper says, "We can excel during the patient's rehabilitation stay, but we also want to ensure that the patient continues to experience even better outcomes through digital follow-up after their rehabilitation period is over. This vision led us to select EvoCare in 2018."

The partnership between Klinik Solequelle and EvoCare is an extraordinary collaboration that has revolutionised the way post-treatment care is managed. Over the past five years, they have diligently provided intensive aftercare programmes to a large number of patients. Remarkably, more than 600 patients have benefited from EvoCare's digital platform.

In EvoCare, Klinik Solequelle has found a seamless and competent service provider that consistently delivers optimal support to its patients. This partnership is having a positive impact on the health and overall wellbeing of patients, confirming the power of effective collaboration in healthcare to improve patient care and support.

"We look forward to continuing our intensive cooperation with EvoCare and are already working on exciting concepts and ideas," says Michael Kemper.

Klinik Solequelle's unwavering commitment to excellence in rehabilitation and aftercare, combined with EvoCare's innovative approach to aftercare, has ushered in a new era where patients will experience healing and recovery like never before.

About EvoCare Holding AG

EvoCare Holding AG is a leading digital health provider and a pioneer in the development of digital health technologies. It stands out as the first company to patent a home therapy platform - the EvoCare Method®.

With over 20 years of experience in digital medicine, the EvoCare Method® aims to help healthcare providers expand their therapy offerings by directly improving the performance and reach of therapists. The result is more efficient and accessible therapeutic care for all.

The EvoCare platform seamlessly integrates the convenience of digitized therapy with the personalised care that is critical to its overall success. This unique combination ensures that the platform cannot be used without the necessary patient-therapist interaction, guaranteeing both the safety and effectiveness of the therapy.

With its strong focus on digital platforms, EvoCare is at the forefront of transforming the healthcare landscape.
